

Drawing 1 - Fixture Assembly

Drawing 2 - Fixture Assembly

▼ start here

1

1. Find a clear area in which you can work.
2. Unpack fixture and glass from carton.
3. Carefully review instructions prior to assembly.

***** The construction of this fixture will be accomplished by first assembling the interior glass globe, installing glass in the cage assembly, attaching the mounting hardware to the junction box, making all necessary electrical connections and then mounting the fixture to the wall.**

2

1. To install glass, insert threaded tube (2) with knurl nut and washer through the center hole in the bottom of the glass globe (1) and hold in position- see **Drawing 2**.
2. Slip washer (3) onto exposed end of threaded tube (2).
3. Thread knurl nut (4) onto threaded tube (2) and hand-tighten only.
4. Slip cap (5) onto threaded tube (2).
5. Thread hex nut (6) onto threaded tube (2) and hand-tighten.
6. Thread finial (7) onto end of threaded tube (2) and hand-tighten.
7. Set globe (1) aside to be installed later.

3

1. Slip loop (11) along wire and thread onto top of fixture- see **Drawings 1 and 2**.
2. To remove the glass clips (8) by using a Philips screwdriver to remove screw (9) from the inside top edge of the cage.
3. Tilt glass panels at an angle and insert them through the panel opening on the side of the cage. Place bottom of glass behind the tab in the bottom of the cage.
4. After all panels are inserted replace the glass clips that were removed earlier.

SAFETY WARNING: READ WIRING AND GROUNDING INSTRUCTIONS (I.S. 18) AND ANY ADDITIONAL DIRECTIONS. TURN POWER SUPPLY OFF DURING INSTALLATION. IF NEW WIRING IS REQUIRED, CONSULT A QUALIFIED ELECTRICIAN OR LOCAL AUTHORITIES FOR CODE REQUIREMENTS.

4

Make electrical connections from supply wire to fixture lead wires. Refer to instruction sheet (I.S. 18) and follow all instructions to make all necessary wiring connections. Then refer back to this sheet to continue installation of this fixture.

5

1. Please refer to the hanging instruction sheet (I.S. 19) provided to continue installation of this fixture. Then refer back to this sheet to install glass.

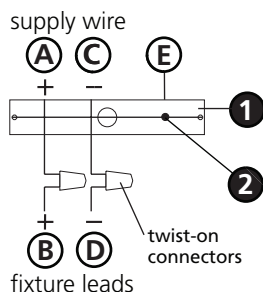

6

1. Fixture can now be lamped accordingly.
2. Install interior globe (1) using the small thumb screws (10) provided - see **Drawing 2**.

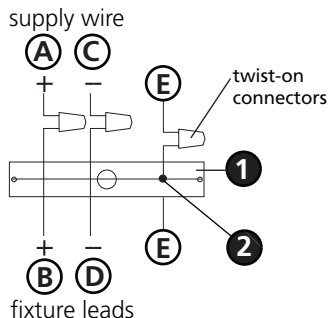

Note: Maximum wattage for 1422 fixture is 100 watts per bulb.

SAFETY WARNING: READ WIRING AND GROUNDING INSTRUCTIONS (I.S. 18) AND ANY ADDITIONAL DIRECTIONS. TURN POWER SUPPLY OFF DURING INSTALLATION. IF NEW WIRING IS REQUIRED, CONSULT A QUALIFIED ELECTRICIAN OR LOCAL AUTHORITIES FOR CODE REQUIREMENTS.

wiring instructions

Indoor Fixtures

1. Connect positive supply wire **(A)** (typically black or the smooth, unmarked side of the two-conductor cord) to positive fixture lead **(B)** with appropriately sized twist on connector - see **Drawings 1 or 2**.
2. Connect negative supply wire **(C)** (typically white or the ribbed, marked side of the two-conductor cord) to negative fixture lead **(D)**.
3. Please refer to the **grounding instructions** below to complete all electrical connections.

Outdoor Fixtures

1. Connect positive supply wire **(A)** (typically black or the smooth unmarked side of the two-conductor cord) to positive fixture lead **(B)** with appropriately sized twist on connector - see **Drawings 2 or 3**.
2. Connect negative supply wire **(C)** (typically white or the ribbed, marked side of the two-conductor cord) to negative fixture lead **(D)**.
3. Cover open end of connectors with silicone sealant to form a watertight seal.
 - If installing a wall mount fixture, use caulk to seal gaps between the fixture mounting plate (backplate) and the wall. This will help prevent water from entering the outlet box. If the wall surface is lap siding, use caulk and a fixture mounting platform specially.
4. Please refer to the **grounding instructions** below to complete all electrical connections.

grounding instructions

Flush Mount Fixtures

For positive grounding in a 3-wire electrical system, fasten the fixture ground wire **(E)** (typically copper or green plastic coated) to the fixture mounting strap **(1)** with the ground screw **(2)** - see **Drawing 1**.

Note: On straps for screw supported fixtures, first install the two mounting screws in strap. Any remaining tapped hole may be used for the ground screw.

Chain Hung Fixtures

Loop fixture ground wire **(E)** (typically copper or green plastic coated) under the head of the ground screw **(2)** on fixture mounting strap **(1)** and connect to the loose end of the fixture ground wire directly to the ground wire of the building system with appropriately sized twist-on connectors - see **Drawing 2**.

Post-Mount Fixtures

Connect fixture ground wire **(E)** (typically copper or green plastic coated) to power supply ground with appropriately sized twist-on connector inside post. Cover open end of connector with silicone sealant to form a watertight seal - see **Drawing 3**.
